

Sprint 1 Report

Project: Hydro Hero

Team: Hydro Homies

Date: 10/20/19

Actions to stop doing:

The team is satisfied with the current process and was able to adequately complete the tasks listed on the scrum board for sprint 1.

Actions to start doing:

We should start working on improving our communication since team members have other obligations besides CSE115 to worry about. Coordinating better to make sure our messages about the projects get through on time is important to ensuring that we keep putting out consistent work.

Actions to keep doing:

We should keep learning to continuously maintain and improve our project. We should also continue staying on track and making sure that everyone is able to work on their tasks.

Work completed/not completed:**Completed:**

- As a project owner, I want to make basic mockups for each of the screens so that developers will know what we need on each one.
- As a developer, I want to set up the app's database so that we are able to save user data in future sprints.
- As a developer, I want to create a basic UI for the home page so that we have UI elements to work with during later stages.
- As a developer, I want to create a basic UI for the history page so that we have UI elements to work with during later stages.

Not Completed:

- As a user, I want a tab/navigation bar so that we are able to navigate between different parts of the app.

Work completion rate:

In this sprint, we were able to complete a total of 4 user stories. The total number of estimated ideal work hours completed during the sprint was approximately 10 hours for each person. The sprint was 12 days long.

Final Burnup Chart
